

E-Commerce Web Application Documentation

1. Project Planning

The E-Shop project is a modern e-commerce web application designed to provide users with a seamless online shopping experience. It aims to enable customers to browse, select, and purchase products conveniently from any device. The system will include user authentication, a shopping cart, checkout functionality, and an admin dashboard for managing products and orders.

Objectives:

- Develop a responsive and user-friendly e-commerce web application using React.
- Implement secure user authentication and product management.
- Create a structured database for users, products, and orders.
- Provide smooth navigation and an intuitive shopping experience.

Scope: The project focuses on the client-side development (frontend) with React, including UI/UX design and API integration. It will simulate a functional online store with product listings, a shopping cart, and checkout processes.

2.

Stakeholder Analysis

Stakeholder	Role	Interest
Customer	End user	Wants an easy, secure, and fast shopping experience
Admin	Manages products and orders	Requires simple control panel and clear data visibility
Developer	Builds and maintains system	Ensures functionality, usability, and performance
Instructor/Supervisor	Evaluator	Monitors project progress and documentation quality

3.

Database Design

The database for E-Shop consists of four main entities: Users, Products, Orders, and CartItems. These tables are interlinked to ensure smooth data flow between customer activities and order management.

Entity Relationship Diagram (ERD):

Users (UserID, Name, Email, Password)

Products (ProductID, Name, Description, Price, Stock, ImageURL)

Orders (OrderID, UserID, OrderDate, TotalAmount, Status) CartItems

(CartItemID, OrderID, ProductID, Quantity)

Relationships:

- Each user can have multiple orders.
- Each order can contain multiple products (through CartItems). - Each product can appear in multiple orders.

4.

UI/UX Design

The image displays two screenshots of a shopping website's user interface, illustrating UI/UX design principles.

Screenshot 1: Home Page

- Header:** Features a logo with a stylized orange 'U' and the word "Shopper". Navigation links include "Shop" (underlined), "Men", "Women", and "Kids". A "Login" button and a shopping cart icon with a red notification bubble are also present.
- Hero Section:** A large pink background image featuring a woman sitting cross-legged, wearing a dark t-shirt with a graphic, grey sweatpants, and colorful sneakers. The text "NEW ARRIVAL ONLY" is at the top left, followed by "new 🙌 collection for everyone". A red button labeled "Latest Collection →" is at the bottom left.

Screenshot 2: Product Category Page

- Header:** Same as the first screenshot, with "Shop" underlined.
- Offer:** A prominent pink banner in the center-left features the text "FLAT 50% OFF" in large orange letters and "12 Hours 20 Mins" below it. A red "Explore now" button is at the bottom of the banner.
- Product Grid:** On the right side, there is a large image of a man wearing a light blue puffer jacket. Below it, four smaller product cards show men in various jackets: a green zip-up hoodie, a white and navy blue color-blocked jacket, a black jacket with a white marbled pattern, and a red and navy blue jacket with "URBAN STREET ACTIVE" text.
- Page Details:** At the bottom left, it says "Showing 1-12 out of 36 products". At the bottom right, there is a "Sort by: v" button.
